One post-doc position in Combinatorial Optimization Group, Institute of Computer Science, University of Wroclaw.

The position is within the project "Algorithmic fundamentals of supply chain networks" led by Jarosław Byrka. The focus is on approximation and online algorithms for network design and inventory management problems.

The position is for up to 14 months starting in Spring 2020. The gross salary is approximately 5450PLN, which is above the Polish average salary and allows for a comfortable living in Wroclaw. It also includes a basic health insurance and an end-of-year benefit. Sufficient travel funding will also be available.

The candidate should hold (or be about to obtain) a PhD in Computer Science, Mathematics, or a closely related field. Preference will be given to external candidates, who have (co-authored) nontrivial results in the field of combinatorial optimization. An application should include:
● curriculum vitae
● diploma
● list of publications
● short description of selected obtained results and general research interests

Our group offers a stimulating working environment,
see:http://ii.uni.wroc.pl/badania/zaklad/ZOK

Wroclaw is a modern city, pleasant to live in, with over 100 000 students.

Applications should be submitted by Jan 31, 2020. Further questions and applications should be send to Jaroslaw Byrka (jaroslaw.byrka [at] cs [dot] uni [dot] wroc [dot] pl).
